

NPP-RPSS-1

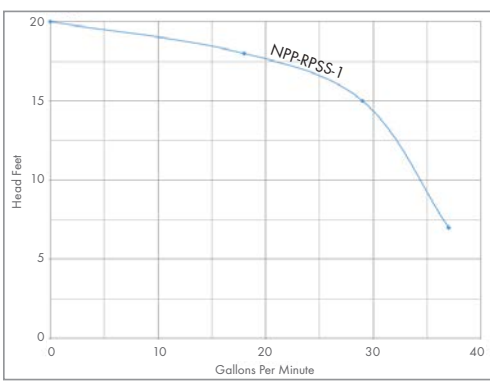

NPP-RPSS SERIES STAINLESS STEEL PORTABLE PUMP

APPLICATIONS:

Residential and portable pump applications. Excellent for general water transfer, basement de-watering, etc. Wastewater treatment and chemical duty applications. Koi Pond, Waterfall, and general circulation applications.

FEATURES:

- Overload protection
- Chemical and abrasive resistant mechanical seal and fluorine elastomers
- All 304 Stainless Construction. High Industrial standard for corrosive resistance
- Small and light weight unit, great choice for portable applications
- Professionally engineered for maximum performance, efficiency, and chemical resistance
- Chemical resistant cable base

NPP-GPSS7503B

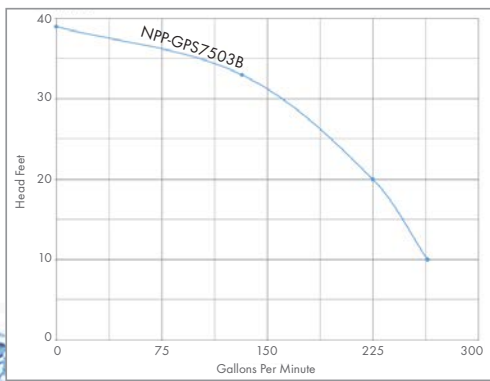

NPP-GPSS SERIES STAINLESS STEEL GRINDER PUMP

APPLICATIONS:

Animal farming, kitchen & food waste, mill & industrial waste water. Waste water treatment water including bones and wood materials.

FEATURES:

- Powerful all stainless steel pump and grinder
- Ability to grind and shred large volumes of aggressive waste material
- Chemical and abrasive resistant double mechanical seal and fluorine elastomers
- Easy to repair and replace wearable parts of the pump assembly
- All 316 Stainless Construction. High Industrial standard for corrosive resistance
- Dynamically balanced impeller and pump shaft for maximum bearing life and pump efficiency
- Cable Base is epoxy filled
