

NPP-HVLH7508B

NPP-HVLH3006B

NPP-HVLHSS1004C

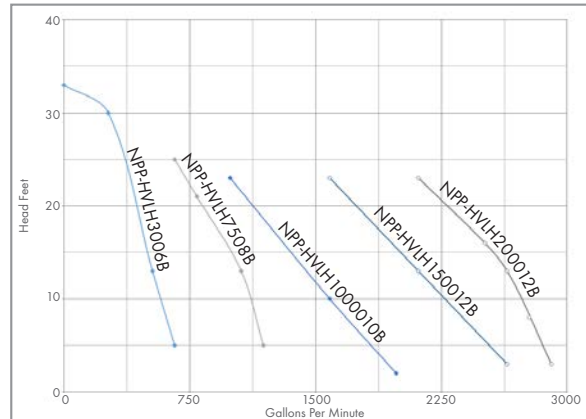

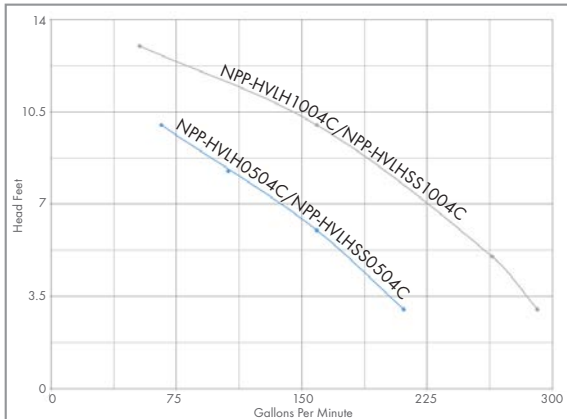

NPP-HVLH SERIES LARGE AXIAL FLOW PUMP

APPLICATIONS:

Agriculture irrigation, high volume canal water transfer, and flood water systems. Flood control, fish farming applications, as well as water fall and aeration uses.

FEATURES:

- Axial flow design, for high capacity and efficient delivery of large volumes of water
- Dual mechanical seal design for long life in wastewater applications
- Motor frame and motor casing made of quality Stainless Steel
- Epoxy filled cable base
- **NPP-HVLHSS** are all Stainless construction for brackish water and chemically abrasive applications
- Available with floating support structure for quick access to large volumes of water and easy installation
- 3hp and larger units are 4pole/1760rpm; ensuring long life and cooler operation temperatures
- Pump is designed with maintenance in mind, easy to repair wearable parts
